Build and modify your 1973-1987 GMC or Chevrolet truck in your garage with step-by-step processes to boost power, add curb appeal, and improve stopping ability, handling, safety, and more. GM's square-body trucks are a solid, simple, and easy-to-find rig--and that makes them perfect for modification. They're American classics, and they've become the hot rods of a new generation. Veteran magazine editor Jim Pickering brings these trucks into focus, taking you through the aspects that make them so popular and modifications you can perform to put a modern spin on their classic looks. He takes an in-depth look at all the major systems in your C10 and covers what can be done to them to turn your classic hauler into the modern hot rod that you want: a truck that's fast, safe, full of curb appeal, and reliable enough to drive whenever and wherever you want. Built in massive numbers during an 18-year production run, these trucks aren't hard to source, but finding a good starting point and mapping out your plan are important. This book covers a lot of territory: how to find a good starter truck, LS power builds and installs, slammed air suspension and coilover systems, automatic and manual transmission choices (including a 6-speed manual conversion), cooling system upgrades, safely adding a modern alternator to factory GM wiring, modifying a mechanical clutch pedal to use a hydraulic master and slave cylinder, making new fuel lines and brake lines to support fuel injection and big brakes, installing a 4-link rear suspension system, fabricating an under-bed mount to hide air suspension components, building exhaust, adding LED lighting, interior restoration, and more. If you're building a square-body truck that you'd actually like to drive regularly, you've come to the right place. There hasn't ever been a more comprehensive, authoritative look at building a complete truck for street use that includes all the steps required to make it work.

With the lies of the past behind her, Addie finds love . . . and discovers her true Father. Addie Sullivan leads a quiet life in a northern California lighthouse. She mourns the death of her father and endures her mother's bitterness, until the night a storm brings an injured stranger and a dark secret to her home. The man insists she is not who she thinks she is, but rather "Julia Eaton"--the child long lost and feared dead by her wealthy family. Seizing the chance to be reunited with the Eatons, Addie leaves her lighthouse home but decides to keep her true identity a secret until they can unravel the mystery. Addie loves the Eatons' palatial home tucked away among the California redwood forests. She feels secure with the jovial family, adores the young boy who is her charge as governess, and finds romance with his father John, a young widower. But sinister shadows overtake Addie's joy. As dusty rooms and secret compartments give up their clues about her past, Addie finds a faith and a love she could never have guessed. To embrace this new world of promise is to risk her life; but to run away is to risk losing the greatest love she's ever known.
