As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

From the author of *Doing Business in Europe* (SAGE, 2018), Gabriele Suder has teamed up with Sumati Varma based in India, and Terence Tsai from China to bring this comprehensive solution for Asian business teaching and learning. The book offers a highly productive mix of international business and marketing theory, and is packed with pedagogical tools to engage and develop understanding, including two full-length corporate case studies per chapter. This is a unique volume covering the most relevant topics of Asia-focused business and management practice spanning from cross-cultural management to supply chain resilience to market entry and expansion strategy, and much more. Specifically designed to meet the needs of Postgraduate, MBA and those taking part in Executive Education programmes, this exciting learning experience will prepare Asia's leaders of the future.

This book compiles brand new case studies on the intricacies and market entry strategies of different companies in China. The sheer speed and scope of China's growth makes it unique and investment opportunities are very attractive. Despite the potential, many western companies fail in their market entry strategies. This book traces the major sources of failure and uses cases to illustrate how firms can better cope with the challenging Chinese market. With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

This book covers recent developments and current status of various materials, designs, and manufacturing practices which together contribute towards weight reduction of systems used in defense, aerospace, and automotive sectors. The topics covered in the volume range from new manufacturing methods such as additive manufacturing, intermetallics, aluminum-based solutions, near net-shaped processes, ultra-light weight metal foam and
