Read Book A Primer On Complete Denture

Forces which will make a complete denture retentive have been described as (a) physiological forces and, (b) physical forces. Physiological forces – These forces are applied to the polished surfaces of the dentures by the muscles of the lips, the cheeks and the tongue. They rely on the patient ' s ability to learn a complex series of neuromuscular reflexes, and this varies from patient to ...

3: Impression Procedures for Complete Dentures | Pocket ...

A complete denture (also known as a full denture, false teeth or plate) is a removable appliance used when all teeth within a jaw have been lost and need to be prosthetically replaced. In contrast to a partial denture, a complete denture is constructed
