On an everyday basis, we communicate with one another using various technological mediums, such as text messaging, social networking tools, and electronic mail, in work, educational, and personal settings. As a consequence of the increasing frequency of use and importance of computer-supported interaction, social scientists in particular have heeded the call to understand the social processes involved in such interactions. In this volume, the editors explore how aspects of a situation interact with characteristics of a person to help explain our technologically-supported social interactions. The person-by-situation interaction perspective recognizes the powerful role of the situation and social forces on behavior, thought, and emotion, but also acknowledges the importance of person variables in explaining social interaction, including power and gender, social influence, truth and deception, ostracism, and leadership. This important study is of great relevance to modern readers, who are more and more frequently using technology to communicate with one another.

Cet ouvrage dresse le panorama des principales expériences d'éducation non-formelle entreprises dans un certain nombre d'états. Elles sont classées en plusieurs catégories : formation industrielle et professionnelle (surtout dans le secteur urbain), formation agricole et développement des communautés rurales, programmes divers et à buts multiples (alphabétisation, planning familial, éducation civique, cours par correspondance).

THE BIOTECH PRIMER takes an in-depth look at the biotech industry, and in particular, the science that drives it. From cell structure to protein structure; gene expression to genetic variation and genetic engineering; the human immune response to the production of antibodies for biotech application; and finally drug discovery, drug development, and biomanufacturing-we discuss the key concepts and technologies that impact current biotechnology developments. This book will support your growth as a biotechnology professional. Although the industry itself is constantly changing, these fundamental concepts upon which it is built will remain important for years to come-and decision-makers who understand these fundamentals will be better able to evaluate and predict new trends.More than anything else, we hope that your understanding of the science behind biotechnology will serve to increase your enthusiasm for this exciting and truly life-changing industry. The future is here-be a part of it.
