800 Q&A deliver a rigorous review for pulmonary board certification Part of the acclaimed McGraw-Hill Education Specialty Board Review series, this well-illustrated review is essential for pulmonary medicine physicians preparing for board certification or recertification. The coverage mirrors the board exam outline of the American Board of Internal Medicine (ABIM), focusing specifically on the most commonly tested topics in obstructive lung disease, critical care, diffuse parenchymal lung disease, sleep medicine, infections, and neoplasms. Offering more illustrations than similar reviews, Pulmonary Disease Examination and Board Review delivers authoritative coverage of the key concepts tested on the certification exam, including: making a diagnosis, test ordering and interpretation, treatment recommendations, understanding epidemiologic studies, understanding pathophysiology, and applying basic science knowledge to clinical situations. Case-based presentation mirrors the exam format Includes numerous high-quality images, including: x-rays, CT scans, and electrocardiograms Excellent as clinical refresher in pulmonary medicine

Neurocritical Care Board Review: Questions and Answers provides clinicians with a thorough review of the complex subspecialty of Neurocritical Care, using a question-and-answer (Q&A) format. The Q&A format is easily readable, high yield, and serves as good practice for test takers or anyone looking to improve or reinforce essential knowledge. The book covers the key topics pertinent to (and found on) neurocritical care boards, and is organized according to the exam core curriculum outline.. A total of 649 questions address both neuroscience critical care (general neurology, neurotrauma, neurovascular and neurosurgical problems) and general critical care topics (systems trauma, cardiovascular, infectious disease, pulmonary and renal issues, and hemodynamic monitoring). Detailed explanations follow in the answer section of each chapter, along with references for further study. Where relevant, neuroimaging, EEG and monitoring waveforms, and other images are included in case questions to allow candidates to familiarize themselves with these tools that form a significant part of the exam. Features of Neurocritical Care Board Review include: Comprehensive, high-yield review that covers all areas tested on the neurocritical care certifying exam Applicability to a wide range of physicians in multiple specialties reviewing for boards or looking to test skills and clinical acumen in this challenging area Question and answer format with detailed explanations and references to facilitate recall of must-know information and help identify knowledge gaps for further attention Material aggregated from multiple specialties into a singular resource for exam study

Clinical Respiratory Medicine provides practical guidance to help you more effectively diagnose and manage the full range of pulmonary disorders, including those seen in today ' s most challenging patient populations. In print and online, this medical reference book delivers the answers you need to ensure the best outcomes.

Better manage and treat patients with pulmonary disease with complete clinical coverage of the critical information relevant to your everyday practice, presented in a templated, user-friendly format. Find critical information quickly with the help of diagnostic algorithms. Thoroughly understand the needs and recognize co-morbidities of particular patient populations through entirely new chapters on lung structure, echocardiography, and obesity and its effects. Access the latest research and advancements in lung cancer, benign tumors, and the importance of pulmonary physiology in understanding lung function and the disease processes that occur. Watch and learn. Over 80 videos of practical procedures and interactive review questions are available online at www.expertconsult.com.

Prepare for success on the Examination of Special Competence in Critical Care Echocardiography (CCEeXAM)! Critical Care Echocardiography Review is a first-of-its-kind, review textbook containing over 1,200 questions and answers. Helmed by Drs. Marvin G. Chang, Abraham Sonny, David Dudzinski, Christopher R. Tainter, Ryan J. Horvath, Sheri M. Berg, Edward A. Bittner as well as a team of associated editors and authors from institutions across the nation, this highly visual resource covers every aspect of the use of ultrasound for clinical diagnosis and management in the critical care setting, providing a thorough, effective review and helping you identify areas of mastery and those needing further study.

Thoroughly updated for its Fourth Edition, this book is a comprehensive review for the American Board of Family Medicine certification and recertification exams. It contains over 1,800 board-format questions, including over 1,000 multiple-choice questions from the major subject areas of family medicine and over 700 questions drawn from 60 clinical problem sets. The book includes a pictorial atlas of clinical photographs, radiographs, and lab smears, with questions regarding these images. Detailed answers and explanations follow the questions. This book includes AMA PRA Category 1 Credit(s)™ sponsored by Lippincott Williams & Wilkins. A companion website includes four practice exams. The website also offers an iPod downloadable audio companion with 120 facts from Bratton's 1000 Facts to Help You Pass the Family Medicine Boards book, with an option to buy more.

Pulmonary rehabilitation programmes are a fundamental part of the clinical management of patients with chronic respiratory diseases. This comprehensive reference book places pulmonary rehabilitation within the wider framework of respiratory disease. Now in six parts, it includes new sections on the development of PR as a discipline, global perspectives on quality control, new chapters on early PR post exacerbation and personalized rehabilitation, innovative approaches to exercise, PR in interstitial lung disease and lung transplantation, and the latest research into the application of music, dance and yoga. Key Features Global contributions compare practice around the world where differences have developed. New six Part structure covers new approaches to exercise testing, interstitial lung diseases and other diseases, and add-on interventions drawing on new technologies. Contains recommendations of the large collaborative ERS/ATS task forces on guidelines for PR as well as suggested policies for its implementation and use. Covers the important topic of balance impairment as a focus of rehabilitation for the at-risk patient and a new chapter on monitoring physical activity. The voices of patients and caregivers
