Knee ligament surgery - Recovery - NHS

In more than 80% of cases, surgery to repair an anterior cruciate ligament (ACL) fully restores the functioning of the knee. ACL surgery will improve the stability of your knee and stop it giving way. You should be able to resume normal activities after 6 months. But your knee may not be exactly like it was before the injury.

Knee ligament surgery - Risks - NHS

Week 0: ACL Reconstructive Surgery May 29, 2019: Underwent surgery to repair the ACL and meniscus in my left knee at the Steadman Clinic in Vail, Colo. It was a two-for-one surgery: The surgeon, Dr. Provencher, first operated on my right knee to harvest the patellar tendon graft, then used that in the left knee ACL reconstruction. When I awoke from the four-hour surgery, a physical therapist ...

ACL Recovery Timeline for Skiers - Ski Mag

A torn anterior cruciate ligament (ACL) is a serious knee injury, especially for athletes. Many teens with a torn ACL will need surgery to repair it. What Is ACL Reconstruction? A torn ACL usually is treated with a procedure called an ACL reconstruction. Surgeons replace the damaged ligament with new ACL graft tissue — either taken from the patient's own body (tissue from the main patellar tendon or the hamstring) or donated from someone else (called an allograft).

What Happens in ACL Surgery? (for Teens) - Nemours KidsHealth

Between harvesting your tissue, the arthroscopy (inserting of the camera and probe), the femoral and tibial drilling, and the constant infusion of saline into the knee to give your surgeon...

ACL Surgery | Anterior Cruciate Ligament Surgery

Typically after ACL surgery is complete you'll be sent home the same day. Once you wake up from anesthesia, you'll likely practice walking on crutches and get fitted with a knee brace or splint.

ACL Surgery Recovery: Tips for Post-Op Care

Overview. ACL reconstruction is surgery to replace a torn anterior cruciate (KROO-she-ate) ligament (ACL) — a major ligament in your knee. ACL injuries most commonly occur during sports that involve sudden stops and changes in direction — such as basketball, soccer, football, downhill skiing and gymnastics.
