Active listening is a person's willingness and ability to hear and understand. At its core, active listening is a state of mind that involves paying full and careful attention to the other person, avoiding premature judgment, reflecting understanding, clarifying information, summarizing, and sharing. By learning and committing to the skills and behaviors of active listening, leaders can become more effective listeners and, over time, improve their ability to lead.

Listening is now regarded by researchers and practitioners as a highly active skill involving prediction, inference, reflection, constructive recall, and often direct interaction with speakers. In this new theoretical and practical guide, Michael Rost and JJ Wilson demonstrate how active listening can be developed through guided instruction. With so many new technologies and platforms for communication, there are more opportunities than ever before for learners to access listening input, but this abundance leads to new challenges: how to choose the right input how to best use listening and viewing input inside and outside the classroom how to create an appropriate syllabus using available resources Active Listening explores these questions in clear, accessible prose, basing its findings on a theoretical framework that condenses the most important listening research of the last two decades. Showing how to put theory into practice, the book includes fifty innovative activities, and links each one to relevant research principles. Sample audio recordings are also provided for selected activities, available online at the series website www.pearsoned.co.uk/rosthilson. As a bridge between theory and practice, Active Listening will encourage second language teachers, applied linguists, language curriculum coordinators, researchers, and materials designers to become more active practitioners themselves, by more fully utilising research in the field of second language listening.

This book helps students listen for gist and specific information, to make inferences and to progress to content-based activities. Expanding Skills for Understanding is the intermediate level of the Active Listening series. By activating students' knowledge of a topic before they listen, the text gives them a frame of reference to make intelligent predictions about what they will hear. The listening activities are content-based, drawing on real information from a variety of sources.
