Usually an activity is something that a student will do that interacts with other students and or the teacher. In Moodle terminology, an Activity, such as Forums or Quizzes, properly means something students can contribute to directly, and is often contrasted to a Resource such as a File or Page, which is presented by the teacher to them. However, the term activity is sometimes for convenience also used to refer to both Activities and Resources as a group.

Activities - MoodleDocs

Teachers can also search outside the school for resources to use in the classroom. By finding resources that are engaging, Martin helps make content vibrant and appealing to students.

Project managers tend to believe their cost estimates - whether they have exceeded budgets in the past or not. It is dangerous to accept the engineering cost estimates, which are often optimistic or unrealistic. Though cost estimates incorporate contingency reserves below-the-line, these estimates of reserves often do not benefit from a rigorous assessment of risk to project costs. Risks to cost come from multiple sources including uncertain project duration, which is often ignored in cost risk analyses. In short, experience shows that cost estimating on projects is rarely successful - cost overruns routinely occur. There are effective ways to estimate the impact on the cost of complex projects from project risks of all types, including traditional cost-type risks and the indirect but often substantial impact from risks usually thought of as affecting project schedules. Integrated cost-schedule risk analysis helps us determine how likely the project will go over budget with the current plan, how much contingency reserve is required to achieve a desired level of certainty, and which risks are most important so the project manager can mitigate them and achieve a better result. Integrated Cost-Schedule Risk Analysis provides solutions for these and other challenges. This book follows on from David Hulett's highly-praised Practical Schedule Risk Analysis. It focuses on the way that schedule risk can generate cost risk, and how to handle this relationship. It also applies the Risk Driver Method to the analysis so that you can clearly and transparently identify the key risks, rather than just the most risky cost line items. With detailed worked examples and over 70 illustrations, Integrated Cost-Schedule Risk Analysis offers the definitive guide to this critically important aspect of project management from surely the world's leading commentator.

A complete guide on course development and delivery using Moodle 3.x Key Features Get the best out of the latest Moodle 3 framework to ensure successful learning Create 3rd party plugins and widgets and secure your course efficiently Create your first Moodle VR app using the Moodle VR toolset Book Description Moodle is a learning platform or Course Management System (CMS) that is easy to install and use, but the real challenge is in developing a learning process that leverages its power and maps the learning objectives to content and assessments for an integrated and effective course. Moodle 3 E-Learning Course Development guides you through meeting that challenge in a practical way. This latest edition will show you how to add static learning material, assessments, and social features such as forum-based instructional strategy, a chat module, and forums to your courses so that students reach their learning potential. Whether you want to support traditional class teaching or lecturing, or provide complete online and distance e-learning courses, this book will prove to be a powerful resource throughout your use of Moodle. You'll learn how to create and integrate third-party plugins and widgets in your Moodle app, implement site permissions and user accounts, and ensure the security of content and test papers. Further on, you'll implement PHP scripts that will help you create customized UIs for your app. You'll also understand how to create your first Moodle VR e-learning app using the latest VR learning experience that Moodle 3 has to offer. By the end of this book, you will have explored the decisions, design considerations, and thought processes that go into developing a successful course. What you will learn Know what Moodle does and how it supports your teaching strategies Install Moodle on your computer and navigate your way around it Understand all of Moodle's learning features Monitor

As a beginner, this is a thorough guide for you to understand how the software works, with great ideas for getting off to a good start with your first course. Some experience of working with e-learning systems will be beneficial. Experienced Moodle users will find powerful insights into developing successful and educational courses.

Strategy management has always been a crucial business aspect that a company must understand to remain successful in the business world. However, there are a number of different approaches that a company can employ in order to differentiate themselves from the competition. Knowledge Management for Competitive Advantage During Economic Crisis brings together the various approaches that affect the superiority of a company's organizational performance and the gains they can make over their competitors. By focusing on concepts such as organizational learning and intellectual capital, this book is an indispensable reference source for researchers, practitioners, graduate students, and business managers interested in understanding what approaches are necessary to ensure superior organizational performance.

The School Nutrition Education Programme (SNEP) is an intervention to educate school students on nutrition and food preparation with the aim of influencing healthy nutrition choice and practice at an age when life time behaviour habits are developing and in the wider community. FAO defines School Food Nutrition Education as consisting of coherent educational strategies and learning activities, with environmental supports, which help schoolchildren and their communities to achieve sustainable improvements in their diets and in food- and lifestyle-related behaviours, perceptions, skills and knowledge; and to build the capacity to change, to adapt to external change and to act as agents of change. This publication is the scopy study and capacity needs assessment and final report for the SNEP project.
