This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from

these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms.

'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board

effective delivery of respiratory support to children, infants and newborns. In the early chapters, developmental issues concerning the respiratory system are considered, physiological and mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed. Thereafter, the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained, with the emphasis on a practical step-by-step approach. Respiratory monitoring and safety issues in ventilated patients are considered in detail, and many other topics of interest to the bedside clinician are covered, including the ethics of withdrawal of respiratory support and

Soon to be a major motion picture from the producers of Spider-Man: Into the Spider-Verse! In a future when humans are believed to be extinct, what will one curious robot do when it finds a girl who needs its help? Humans went extinct thirty years ago. Now the world is ruled by machines. And twelve-year-old robot XR\_935 is just fine with that. Without humans around, there is no war, no pollution, no crime. Every member of society has a purpose. Everything runs smoothly and efficiently. Until the day XR discovers something

impossible: a human girl named Emma. Now, Emma, XR, and two other robots must embark on a dangerous voyage in search of a mysterious point on a map. But how will they survive in a place where rules are never broken and humans aren't even supposed to exist? And what will they find at the end of their journey? Narrated in the first person (first robot?) by XR, *The Last Human* blends humor and action with moments of poignancy to tell a story about friendship, technology, and challenging the status quo no matter the consequences. It's not just about what it means to be a robot. It's about what it means to be a human.

A user-friendly introduction to social inequality. This text is a broad introduction to the many types of inequality- economics, status, political power, sex and gender, sexual orientation, race, and ethnicity- in U.S. society and in a global setting. The author provides a wide range of explanations for inequality and, using the latest research on the multiple impacts of inequality, surveys in detail the personal and social consequences of social inequality. Learning Goals  
Upon completing this book, readers will be able to:  
Understand that inequality is multidimensional  
Understand that it is essential to understand the explanations of the various forms of inequality in order to further a resolution to any inequality's

Acute organ damage and the ensuing multiple organ failure are the result of a pathophysiological process involving various cytokines. Once activated, these proteins cannot be eliminated even when the kidneys function at their maximum capacity. To counteract this mechanism, researchers in Japan have developed an innovative concept employing blood purification to remove the overwhelming cytokines. This book describes the use of hemodiafiltration to inhibit the cytokine storms which cause serious organ damage in

patients with septic shock. Moreover, the technical construction of the blood purification system, which includes various machines, devices, membranes, fluids, etc., is explained in detail. Finally, leading experts discuss the concept of continuous renal replacement therapy as the standard care in critically ill patients with severe acute kidney injury. Describing the current state of acute blood purification, this publication provides new impulses and opens new avenues in the treatment of acute organ damage.
