Adaptability as Sustainable Design Strategies in Hospitals ...

□As building services engineers, our responsibility is to incorporate elements into the design that are truly sustainable and will contribute to energy efficiency and reducing our carbon footprint; but part of that also relates to how the systems and the building itself can be designed with adaptability for future flexibility and to address possible climate impacts,□ Richard said.

Sustainable Design: Building for Resilience - Tetra Tech

The focus of this workshop is on integrating sustainable technologies into the design strategy of new communities or regeneration projects.
