has been made against cancer, the battle is far from over. It is estimated that there are 175,000 new female breast cancer cases, annually, and 40,000 deaths resulting from it in the U. S. In fact, breast cancer incidence rates have shown little change in the 1990s, while breast cancer death rates have been

Advances In  
in Living Systems: 1 ...  
Electromagnetic fields  
(EMF) have been  
implicated to influence a  
range of bodily  
functions. Given their  
ubiquitous nature,  
widespread applications,  
and capability to  
produce deleterious  
effects, conclusive  
investigations of the  
health risks are critical.
