The MixRack is the heart of the iLive system, housing the DSP, most of the I/O, networking and control interfaces. The tiny iDR-16 is ideal where the physical I/O requirement is small, but as with all the MixRacks can also be used to process the full 64 channels in a compact linked system with digital mic split.

The T112 surface features the same intuitive layout that has delighted iLive users around the world. Its instantly accessible analogue-style rotary controls and switches, visually informative channel labelling and colour coding, comprehensive metering, graphical colour touchscreen, and logical layout allows the user to avoid fiddly menus and instinctively find controls. The jump from analogue to digital has never been so easy. Each bank of faders has four layers, so the T112 control surface ...
