"The Other Kingdom is about reframing how society views its communal identity. The book proposes to identify what has been considered sacred language and use it as an opening into the experience of community and the commons. It lays out a faith narrative without the negative traces of sectarianism. Readers are dared to imagine the human benefit of an alternative to the market ideology that defines our culture, called the Neighborly Covenant because it enlivens and humanizes the social order. The Other Kingdom proposes language for alternative ways to a covenantal culture, one that is active beyond election years and has different substance in defining society's communal identity"--

Our seduction into beliefs in competition, scarcity, and acquisition are producing too many casualties. We need to depart a kingdom that creates isolation, polarized debate, an exhausted planet, and violence that comes with the will to empire. The abbreviation of this empire is called a consumer culture. We think the free market ideology that surrounds us is true and inevitable and represents progress. We are called to better adapt, be more agile, more lean, more schooled, more, more, more. Give it up. There is no such thing as customer satisfaction. We need a new narrative, a shift in

our thinking and speaking. *An Other Kingdom* takes us out of a culture of addictive consumption into a place where life is ours to create together. This satisfying way depends upon a neighborly covenant—an agreement that we together, will better raise our children, be healthy, be connected, be safe, and provide a livelihood. The neighborly covenant has a different language than market-hype. It speaks instead in a sacred tongue. Authors Peter Block, Walter Brueggemann, and John McKnight invite you on a journey of departure from our consumer market culture, with its constellations of empire and control. Discover an alternative set of beliefs that have the capacity to evoke a culture where poverty, violence, and shrinking well-being are not inevitable—a culture in which the social order produces enough for all. They ask you to consider this other kingdom. To participate in this modern exodus towards a modern community. To awaken its beginnings are all around us. *An Other Kingdom* outlines this journey to construct a future outside the systems world of solutions.

" We need our neighbors and community to stay healthy, produce jobs, raise our children, and care for those on the margin. Institutions and professional services have reached their limit of their ability to help us. The consumer society tells us that we are insufficient and that we must purchase what we need from specialists and systems outside the community. We have become consumers and clients, not citizens and neighbors. John McKnight and Peter Block show that we have the capacity to find real and sustainable satisfaction right in our neighborhood and community. This book reports on voluntary, self-organizing structures that focus on gifts and value hospitality, the welcoming of strangers. It shows how to reweave our social fabric, especially in our neighborhoods. In this way we collectively have enough to create a future that works for all. "

Most of our communities are fragmented and at odds within

themselves. Businesses, social services, education, and health care each live within their own worlds. The same is true of individual citizens, who long for connection but end up marginalized, their gifts overlooked, their potential contributions lost. What keeps this from changing is that we are trapped in an old and tired conversation about who we are. If this narrative does not shift, we will never truly create a common future and work toward it together. What Peter Block provides in this inspiring new book is an exploration of the exact way community can emerge from fragmentation. How is community built? How does the transformation occur? What fundamental shifts are involved? What can individuals and formal leaders do to create a place they want to inhabit? We know what healthy communities look like—there are many success stories out there. The challenge is how to create one in our own place. Block helps us see how we can change the existing context of community from one of deficiencies, interests, and entitlement to one of possibility, generosity, and gifts. Questions are more important than answers in this effort, which means leadership is not a matter of style or vision but is about getting the right people together in the right way: convening is a more critical skill than commanding. As he explores the nature of community and the dynamics of transformation, Block outlines six kinds of conversation that will create communal accountability and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging. In *Community*, Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.

Goes beyond the spirit of empowerment to discuss the benefits of companies that offer equity and partnership for its employees at all levels, discussing what stewardship means, management accountability, quality control, and human resources. Reprint.

The fading lights of the departing train force Josephine Trent out of the shadows... She could barely stifle the scream that rose to her throat as waves of self-loathing, relief and pain threatened to smother her. Her actions leave her in a state of shock and disbelief, as the image of her baby being snatched out of her hands manifested itself before her eyes. This desperate step sets off a chain of events that would plunge their lives into an abyss so dark that the annihilation of two beautiful souls was inevitable.

Revised edition of the best-selling memoir that has been read by over a million people worldwide with translations in 29 languages. After too many years of unfulfilling work, Bronnie Ware began searching for a job with heart. Despite having no formal qualifications or previous experience in the field, she found herself working in palliative care. During the time she spent tending to those who were dying, Bronnie's life was transformed. Later, she wrote an Internet blog post, outlining the most common regrets that the people she had cared for had expressed. The post gained so much momentum that it was viewed by more than three million readers worldwide in its first year. At the request of many, Bronnie subsequently wrote a book, *The Top Five Regrets of the Dying*, to share her story. Bronnie has had a colourful and diverse life. By applying the lessons of those nearing their death to her own life, she developed an understanding that it is possible for everyone, if we make the right choices, to die with peace of mind. In this revised edition of the best-selling memoir that has been read by over a million people worldwide, with translations in 29 languages, Bronnie expresses how significant these regrets are and how we can positively address these issues while we still have the time. *The Top Five Regrets of the Dying* gives hope for a better world. It is a courageous, life-changing book that will leave you feeling more

Finally, a book that offers a practical yet well-researched guide for practitioners seeking to hone the way they show up in citizen space. At a time when public trust in institutions is at its lowest, expectations of those institutions to make people well, knowledgeable, and secure are rapidly increasing. These expectations are unrealistic, causing disenchantment and disengagement among citizens and increasing levels of burnout among many professionals. Rekindling Democracy is not just a practical guide; it goes further in setting out a manifesto for a more equitable social contract to address these issues. Rekindling Democracy argues convincingly that industrialized countries are suffering through a democratic inversion, where the doctor is assumed to be the primary producer of health, the teacher of education, the police officer of safety, and the politician of democracy. Through just the right blend of storytelling, research, and original ideas, Russell argues instead that in a functioning democracy the role of the professionals ought to be defined as that which happens after the important work of citizens is done. The primary role of the twenty-first-century practitioner therefore is not a deliverer of top-down services, but a precipitator of more active citizenship and community building.
