Animal Farm is an allegorical novella by George Orwell. The book tells the story of a group of farm animals who rebel against their human farmer, hoping to create a society where the animals can be equal, free, and happy. Ultimately, however, the rebellion is betrayed, and the farm ends up in a state as bad as it was before, under the dictatorship of a pig named Napoleon. One night, all the animals at Mr. Jones' Manor Farm assemble in a barn to hear old Major, a pig, describe a dream he had about a world where all animals live free from the tyranny of their human masters. old Major dies soon after the meeting, but the animals — inspired by his philosophy of Animalism — plot a rebellion against Jones. Two pigs, Snowball and Napoleon, prove themselves important figures and planners of this dangerous enterprise. When Jones forgets to feed the animals, the revolution occurs, and Jones and his men are chased off the farm. Manor Farm is renamed *Animal Farm*, and the Seven Commandments of Animalism are painted on the barn wall...

Most social science studies of local organizations tend to focus on "civil society" associations, voluntary associations independent from state control, whereas government-sponsored organizations tend to be theorized in totalitarian terms as "mass organizations" or manifestations of state corporatism. *Roots of the State* examines neighborhood associations in Beijing and Taipei that occupy a unique space that exists between these concepts. Benjamin L. Read views the work of the neighborhood associations he studies as a form of "administrative grassroots engagement." States sponsor networks of organizations at the most local of levels, and the networks facilitate governance and policing by building personal relationships with members of society. Association leaders serve as the state's designated liaisons within the neighborhood and perform administrative duties covering a wide range of government programs, from welfare to political surveillance. These partly state-controlled entities also provide a range of services to their constituents. Neighborhood associations, as institutions initially created to control societies, may underpin a repressive regime such as China's, but they also can evolve to empower societies, as in Taiwan. This book engages broad and much-discussed questions about governance and political participation in both authoritarian and democratic regimes.

An examination of political, social and cultural developments in the Soviet Union. The book identifies the social tensions and political inconsistencies that spurred radical change in the government of Russia, from the turn of the century to the revolution of 1917. Kenez envisions that revolution as a crisis of authority that posed the question, 'Who shall govern Russia?' This question was resolved with the creation of the Soviet Union. Kenez traces the development of the Soviet Union from the Revolution, through the 1920s, the years of the New Economic Policies and into the Stalinist order. He shows how post-Stalin Soviet leaders struggled to find ways to rule the country without using Stalin's methods but also without openly repudiating the past, and to negotiate a peaceful but antipathetic coexistence with the capitalist West. In this second edition, he also examines the post-Soviet period, tracing Russia's development up to the time of publication.

Genuine Pretending is an innovative and comprehensive new reading of the Zhuangzi that highlights the critical and therapeutic functions of satire and humor. Hans-Georg Moeller and Paul J. D' Ambrosio show how this Daoist classic, contrary to contemporary philosophical readings, distances itself from the pursuit of authenticity and subverts the dominant Confucianism of its time through satirical allegories and ironical reflections. With humor and parody, the Zhuangzi exposes the Confucian demand to commit to socially constructed norms as pretense and hypocrisy. The Confucian pursuit of sincerity establishes exemplary models that one is supposed to emulate. In contrast, the Zhuangzi parodies such venerated representations of wisdom and deconstructs the very notion of sagehood. Instead, it urges a playful, skillful, and unattached engagement with socially mandated duties and obligations. The Zhuangzi expounds the Daoist art of what Moeller and D' Ambrosio call "genuine pretending": the paradoxical skill of not only surviving but thriving by enacting social roles without being tricked into submitting to them or letting them define one's identity. A provocative rereading of a Chinese philosophical classic, Genuine Pretending also suggests the value of a Daoist outlook today as a way of seeking existential sanity in an age of mass media's paradoxical quest for originality.
