In this ground-breaking book, acclaimed sociologist Ann Oakley undertook one of the first serious sociological studies to examine women's work in the home. She interviewed 40 urban housewives and analysed their perceptions of housework, their feelings of monotony and fragmentation, the length of their working week, the importance of standards and routines, and their attitudes to different household tasks. Most women, irrespective of social class, were dissatisfied with housework – an important finding which contrasted with prevailing views. Importantly, too, she showed how the neglect of research on domestic work was linked to the inbuilt sexism of sociology. This classic book challenged the hitherto neglect of housework as a topic worthy of study and paved the way for the sociological study of many more aspects of women's lives.

This book explores the use of corporate history for communication and marketing purposes.

Thinking About Children collects thirty-one papers, of which twenty-eight have never previously been published. As might be expected, they range widely in tone and content from concise clinical observations to more general meditations including the landmark paper "Towards an objective study of human nature". Of particular interest are sections on autism and psychosomatics, where the author's thinking can be seen to foreshadow more recent developments, such as Frances Tustin's work on autism. Together with a substantial introduction by the editors, this book is indispensable for those acquainted with the author's work, and an ideal introduction for those who have not yet encountered the extraordinary clarity and depth of his thought.

The definitive book on the controversial relationship between Roman civilisation and the barbarian populations between the 1st and the 6th centuries A.D. It is now a well-recognized fact that during the Roman Empire, tens of millions of Germans crossed its border. Germanic mercenaries served loyally under Julius Caesar, first as auxiliaries, later as legionaries, while some reached important military ranks. Today it is accepted that without the contribution of the Germans, it would have been difficult for the Roman Empire to last as long as it did. But how did Rome repay the northern barbarians for their almost total availability? This scholarly and accessible volume attempts to provide an answer to this historical puzzle.

In Breaktime, Ditto challenges Morgan to prove that literature is crap and triggers off a chain of events to alter his outlook of life forever. Ditto faces a series of charges from Morgan against literature: that all fiction is Done. Finished. Dead; a sham and a pretence. He undertakes faithfully to record a life in the week of Ditto - with all the chaos of reality thrown in - and his literary creation reveals more about himself than he originally bargained for.
