Attachment, Evolution, and the
Psychology of Religion by ...

Attachment theory is one of the most enduring theoretical frameworks in psychology, spanning the areas of developmental psychology, social/personality psychology, and evolutionary psychology. Broadly, classical attachment theory, originally developed by John Bowlby, focuses on the development of attachment bonds between parents and infants, and how those early attachments

Attachment, Evolution, and the
Psychology of Religion ...

The incorporation of evolutionary theory into psychology has waxed and waned in the 150 years since Darwin (1859) predicted that the field would be based on a new foundation. There are many notable examples of psychological theories with evolutionary bases, such as Bowlby's (1969) model of attachment, yet these are often isolated examples.

Evolutionary Theory and Psychology
The field of evolutionary psychology looks at how evolutionary pressures

Read Free Attachment Evolution And The

Psychology Of Religion
led to particular adaptations such as these. Evolutionary psychology is related to both macroevolution in the sense that it looks at how the human species (especially the brain) has changed over time, and it is also rooted in the ideas attributed to microevolution.
