AMC / Olympiad Practice Questions & Past Papers
Australian Intermediate Mathematics Olympiad 2018 Solutions 1. Method 1 The table shows the product 2x7×39 for all values of x. 1 x 2x7×39 x 2x7×39 0 8073 5 10023 1 8463 6 10413 2 8853 7 10803 3 9243 8 11193 4 9633 9 11583 Thus x = 8. 1 Method 2 We have 2x7×39 = 2x7×30+2x7×9. The units digit in 2x7×30 is 0, and its tens digit is 1.

In the early 80's, Peter O'Halloran a math teacher at Sydney, invented a new kind of game in Australian schools: a multiple choice questionnaire, corrected by computer, which meant that thousands of pupils could participate at the same time. It was a tremendous success for the Australian Mathematical National Contest.

International Mathematical Olympiad
Australian Intermediate Mathematics Olympiad 2017 Solutions 1. We havex = b2 +b+1 and x = 2(b?2)2 +(b?2)+2 = 2(b2 ?4b+4)+ b =2 b2 ?7b+8. 1 Hence 0 = (2b2 ?7b+8)?(b2 +b+1) = b2 ?8b+7=(b?7)(b?1). From the given information, b?2 > 2. So b = 7 and x =49+7+1= 57. 1 2. Method 1 Let B 1C 1, B 2C 2, B 3C 3, be the lines parallel to BC as shown. Then triangles ABC, AB 1C 1, AB 2C 2, AB 3C

International Congresses on Mathematical Education (ICMEs), under the auspices of the International Commission on Mathematical Instruction, are held every four years. Previous Congresses have been held in France (Lyons), England (Exeter), the Federal Republic of Germany (Karlsruhe), and the United States of America (Berkeley). The Fifth International Congress on Mathematical Education (ICME 5) was held in Adelaide, Australia, from August 24-30, 1984. More than 1800 participants from over 70 countries participated in the Congress, while some additional 200 people attended social functions and excursions. The program for ICME 5 was planned and structured by an International Program Committee, and implemented by the National Program Committee in Australia. For the main body of the program, Chief Organisers, assisted by Australian Coordinators, were invited to plan and prepare the individual components of the program which addressed a wide range of topics and interest areas. Each of these teams involved many individuals from around the world in the detailed planning and preparation of the working sessions for their area of program responsibility. For the actual working sessions at the Congress, the smallest group had some 60 members, while the largest had well over 300. In addition to the working sessions, there were three major plenary addresses, several specially invited presentations, and over 420 individual papers in the form of short communications, either as posters or brief talks.
