Suggests organic methods for growing plants and raising animals on a small plot of land, explains how to determine the proper times for planting, and provides tips for using and preserving food.

Enjoy a weekend breakfast featuring eggs, bacon, and honey from your own chickens, pigs, and bees, or a holiday meal with your own heritage-breed turkey as the main attraction. Gail Damerow covers everything you need to successfully raise your own farm animals, from selecting the right breeds to producing delicious fresh milk, cheese, honey, eggs, and meat. Even with just a small plot of land, you can become more self-sufficient, save money, and enjoy healthy, delicious animal products.

The Backyard Beekeeper, now revised and expanded, makes the time-honored and complex tradition of beekeeping an enjoyable and accessible backyard pastime that will appeal to gardeners, crafters, and cooks everywhere. This expanded edition gives you even more information on "greening" your beekeeping with sustainable practices, pesticide-resistant bees, and urban and suburban beekeeping. More than a guide to beekeeping, it is a handbook for harvesting the products of a beehive and a honey cookbook--all in one lively, beautifully illustrated reference. This complete honey bee resource contains general information on bees; a how-to guide to the art of bee keeping and how to set up, care for, and harvest honey from your own colonies; as well as tons of bee-related facts and projects. You'll learn the best place to locate your new bee colonies for their safety and yours, and you'll study the best organic and nontoxic ways to care for your bees, from providing fresh water and protection from the elements to keeping them healthy, happy, and productive. Recipes of delicious treats, and instructions on how to use honey and beeswax to make candles and beauty treatments are also included.

This extensively revised and expanded edition broadens the reach and depth of the permaculture approach for urban and suburban gardeners. The text's message is that working with nature, not against it, results in more beautiful, abundant, and forgiving gardens.
