Cellular Respiration Lab Report Instructions: In this laboratory activity, you will calculate the rate of cellular respiration in germinating and non-germinating peas using a respirometer to measure the amount of oxygen consumed. You will also investigate the effects of temperature, light, or seed type on the rate of respiration. Submit your lab report to your instructor when completed.

Rate of Cellular Respiration With and Without Exercise; In this experiment, the process of cellular respiration will be examined through the production of CO 2 gas. Since gases are invisible, CO 2 production will be measured qualitatively by using a pH indicator called phenol red. Phenol red is orange in appearance with a neutral pH.
