The fourth hour is a required class meeting in which students work additional assigned lab problems with assistance from a graduate student teaching assistant. Both in class and in the laboratory, ...

The Laboratory Manual provides an emphasis on critical thinking and includes Safety Guidelines, Objectives, A List of Materials Needed, Topic Introduction, Activities with embedded questions, and Critical Thinking Questions.

NEW! Now in full color! With its distinctive investigative approach to learning, this best-selling laboratory manual is now more engaging than ever, with full-color art and photos throughout. As always, the lab manual encourages students to participate in the process of science and develop creative and critical-reasoning skills. The Eighth Edition includes major revisions that reflect new molecular evidence and the current understanding of phylogenetic relationships for plants, invertebrates, protists, and fungi. The sequence of the lab topics has been reorganized to reflect the closer relationship of the fungi and animal kingdoms. A new lab topic, "Fungi," has been added, providing expanded coverage of the major fungi groups. The "Protists" lab topic has been revised and expanded with additional examples of all the major clades. Both lab topics include suggestions and exercises for open-inquiry investigations. In the new edition, population genetics is covered in one lab topic with new problems and examples that connect ecology, evolution, and genetics.

With its distinctive investigative approach to learning, this best-selling laboratory manual is now more engaging than ever, with full-color art and photos throughout. The lab manual encourages students to

participate in the process of science and develop creative and critical-reasoning skills.

"Through his teaching, his textbook, and his online blog, Michael D. Johnson sparks interest by connecting basic biology to real-world issues relevant to your life. Through a storytelling approach and extensive online support, *Human Biology : Concepts and Current Issues*, Seventh edition not only demystifies how the human body works but drives you to become a better, more discerning consumer of health and science related information." --

One of the best ways for your students to succeed in their biology course is through hands-on lab experience. With its 46 lab exercises and hundreds of color photos and illustrations, the *LABORATORY MANUAL FOR GENERAL BIOLOGY*, Fifth Edition, is your students' guide to a better understanding of biology. Most exercises can be completed within two hours, and answers to the exercises are included in the Instructor's Manual. The perfect companion to Starr and Taggart's *BIOLOGY: THE UNITY AND DIVERSITY OF LIFE*, Eleventh Edition, as well as Starr's *BIOLOGY: CONCEPTS AND APPLICATIONS*, Sixth Edition, and *BIOLOGY: TODAY AND TOMORROW*, this lab manual can also be used with any introductory biology text.

The *Biology Laboratory Manual* by Vodopich and Moore was designed for an introductory biology course with a broad survey of basic laboratory techniques. The experiments and procedures are simple, safe, easy to perform, and especially appropriate for large classes. Few experiments require more than one class meeting to complete the procedure. Each exercise includes many photographs, traditional topics, and experiments that help students learn about life. Procedures within each exercise are numerous and discrete so that an exercise can be tailored to the needs of the students, the style of the instructor, and the facilities available.

*A Photographic Atlas for the Biology Laboratory*, Seventh Edition by Byron J. Adams and John L. Crawley is a full-color photographic atlas that provides a balanced visual representation of the diversity of biological organisms. It is designed to accompany any biology textbook or laboratory manual.

This package contains the following components: -0321536606: Investigating Biology Lab Manual  
-0321543254: Biology with MasteringBiology™
