This manual attempts to provide simple, adequate and evidence-based information to health care professionals in primary health care especially in low- and middle-income countries to be able to provide pharmacological treatment to persons with mental disorders. The manual contains basic principles of prescribing followed by chapters on medicines used in psychotic disorders; depressive disorders; bipolar disorders; generalized anxiety and sleep disorders; obsessive compulsive disorders and panic attacks; and alcohol and opioid dependence. The annexes provide information on evidence retrieval, assessment and synthesis and the peer view process.

Inspired Recovery is a compilation of true stories from people who have achieved their life goals while managing bipolar disorder, schizophrenia, schizoaffective disorder or depression. Julie Edwards has suffered from mental illness her entire life. The eldest of four children born into a destitute family in outback Australia in 1948, Julie was diagnosed with 'manic depression' at age eighteen. Her experiences include severe symptoms of depression, mania and psychosis; numerous treatments including medication and electroconvulsive therapy; violent physical and emotional abuse through dysfunctional relationships; bereavement and loss, including the tragic death of two husbands; substance abuse; serious physical health issues; attempted suicide; complete breakdown and the development of additional psychiatric disorders. Medical treatment and pharmacology play a major role in the recovery process - but so does the human spirit. Now aged sixty, Edwards describes her life as 'filled with joy!' Though a 'cure' for schizoaffective disorder is not yet known, she has developed a successful strategy to achieve recovery and live a rich, full life. It is her story that has inspired her daughter, Sonya Melbourne, to gather and share these beautiful, true accounts as a message of hope for those who suffer from serious mental illnesses, and those who care about them.

For Hannah Westberg, life has been one big emotional roller coaster. As a girl, her mother was in and out of mental hospitals, so when it was her turn to visit the psych ward following a suicide attempt the summer after eighth grade, she had an idea of what she was in for. But that was only the beginning of Hannah's journey. Over the next five years, Hannah has engaged in dangerous behaviors--from pill popping and excessive dieting to cutting--and paid a high price. Her depression, self-harm, and suicidal tendencies have landed her in rehab and therapy and with a diagnosis of borderline personality disorder. But though she may have a label for her mental illness and tools for coping, for Hannah, life is still something she takes one day at a time.--From publisher description.

In the vein of *An Unquiet Mind* comes a storm of a memoir that will take you deep inside bipolar disorder and change everything you know. When Marya Hornbacher published her first book, *Wasted: A Memoir of Anorexia and Bulimia*, she did not yet have the piece of shattering knowledge that would finally make sense of the chaos of her life. At age twenty-four, Hornbacher was diagnosed with Type I rapid-cycle bipolar, the most severe form of bipolar disorder. In *Madness*, in her trademark wry and utterly self-revealing voice, Hornbacher tells her new story. Through scenes of astonishing visceral and emotional power, she takes us inside her own desperate attempts to counteract violently careening mood swings by self-starvation, substance abuse, numbing sex, and self-mutilation. How Hornbacher fights her way up from a madness that all but destroys her, and what it is like to live in a difficult and sometimes beautiful life and marriage—where bipolar always beckons—is at the center of this brave and heart-stopping memoir. *Madness* delivers the revelation that Hornbacher is not alone: millions of people in America today are struggling with a variety of disorders that may disguise their bipolar disease. And Hornbacher's fiercely self-aware portrait of her own bipolar as early as age four will powerfully change, too, the current debate on whether bipolar in children actually exists. *New York Times* "Humorous, articulate, and self-aware...A story that is almost impossible to put down."— "With the same intimately revelatory and shocking emotional power that marked [*Wasted*], Hornbacher guides us through her labyrinth of psychological demons."—*Elle*

"Provides information about depression and bipolar disorder, including treatment, diagnosis, history, medical advances, and true stories

about people with the diseases"--Provided by publisher.

The moonlight sliced into the alleyway as twenty-one-year-old Kirk Miller opened his eyes and stared at the night sky. His head throbbed as the world spun gently. The cold, hard cement felt oddly soothing, but even with all the alcohol and drugs flowing through his veins, Kirks mind was still racing. It would be a year until he was told that those feelings were related to what professionals called a manic episode. Welcome to the world of bipolar disorder. It is no secret that bipolar disorder is one of the most misunderstood and devastating mental disorders for the diagnosed and those who care for them. But what if there were a cure? In his compelling memoir, Miller details how he was diagnosed with the most severe form of bipolar disorder, was told he would never lead a normal life, and eventually refused to accept his fate. As he began a determined search for answers through research, educated guesses, and risks that nearly cost him his life, Miller shares how he stumbled onto a new method of treating his disorder that, remarkably, helped him achieve a full recovery. Chaos to Cured shares the true story of one mans courageous journey to finding a cure for bipolar disorder with the hope that everyone will one day have a second chance in life.

True story of the author's personal healing of her Bipolar Disorder without the use of drugs.

If we choose to trust unconditionally, how many lives could we change? When Pastor Bruce Deel took over the Mission Church in the 30314 zip code of Atlanta, he had orders to shut it down. The church was old and decrepit, and its neighborhood--known as "Better Leave, You Effing Fool," or "the Bluff," for short--had the highest rates of crime, homelessness, and incarceration in Georgia. Expecting his time there to only last six months, Deel was not prepared for what happened next. One Sunday, he was approached by a woman he didn't know. "I've been hooking and stripping for fourteen years," she said. "Can you help me?" Soon after, Bruce founded an organization called City of Refuge rooted in the principle of radical trust. Other nonprofits might drug test before offering housing, lock up valuables, or veto a program giving job skills and character references to felons as "a liability." But Bruce believed the best way to improve outcomes for the marginalized and impoverished was to extend them trust, even if that trust was violated multiple times--and even if someone didn't yet trust themselves. Since then, City of Refuge has helped over 20,000 people in Atlanta's toughest neighborhood escape the cycles of homelessness, joblessness, and drug abuse. Of course, trust alone can't overcome a broken system that perpetuates inequality. Presenting an unvarnished window into the lives of ex-cons, drug addicts, human trafficking survivors, and displaced souls who have come through City of Refuge, Trust First examines the context in which Bruce's Atlanta neighborhood went downhill--and what City of Refuge chose to do about it. They've become a one-stop-shop for transitional housing, on-site medical and mental health care, childcare, and vocational training, including accredited intensives in auto tech, culinary arts, and coding. While most social services focus on one pain point and leave the burden on the poor to find the crosstown bus that'll serve their other needs, Bruce argues that bringing someone out of homelessness requires treating all of their needs simultaneously. This model has proven so effective that a dozen new chapters of City of Refuge have opened in the US, including in California, Illinois, Ohio, Maryland, Virginia, Texas, and Georgia. More than a narrative about a single place in time, this radical primer for behavioral change belongs on every leader's shelf. Heartfelt, deeply personal, and inspiring, Trust First will break down your assumptions about whether anyone is ever truly a lost cause. Bruce will donate a portion of his proceeds from Trust First to the charitable organization City of Refuge.

Description This book includes 14 true stories from people with bipolar disorder or unipolar depression and their great courage and suffering, their struggles and triumphs. Edited or co-written by Katy Sara Culling, the stories are all of high quality and interest. Each story is totally unique, giving the reader a broad spectrum of mood disorder experiences to draw from, making this book useful for the sufferer, carers, and medical professional, as well as the general public who wish to educate themselves about these topics. As with mood disorders there are a wide range of treatments used, from therapy to medication and electroconvulsive therapy (ECT). All are covered in this book. As it is common for co-disorders to exist, especially alcoholism, anxiety and eating disorders, some of the stories include tales of people struggling with these issues as well as their mood disorder. That is, after all, true to life. Because peoples' experiences with mood disorders vary there is a chapter at the end explaining mood disorders and the terminology. This can be read before the stories in the book if a person feels they need to know the background information first. This means a person who knows nothing about mood disorders can pick up this book, read it, and finish with a good understanding of the subject. Comments from readers include: "I have never cried and laughed so much at stories in one book and to think they are all true is amazing. I was thankful for the factual chapter too, I learned a great deal. I wish I had had this book to read years ago when my own daughter fell ill, so that I could have appreciated just how serious a battle these people face - a battle that is not always won." Sue Willcocks "Deeply moving and important tales. The bravery of these people to tell their tales in a world full of stigma against mental illness should be commended. Katy Sara should be proud for helping to give a voice to such people." Peter O "I am so glad to know that I am not the only person who feels like this. This book empowers all people with bipolar disorder or depression. I hope it enlightens those people who laugh or don't take these illnesses seriously." Liz Broughton. "Brilliant writing, packed with information and stories that you couldn't make up if you tried. Some so very sad - these illnesses are serious business." Paul Michaels. About the Author Katy Sara Culling was born in Liverpool, North England, in January 1975, sharing her birth date rather aptly with Virginia Woolf. Daughter of Sue and Paul Culling, her family moved back to its roots in Derbyshire, where she grew up along with her younger sister Beth, in the village of Castle Donington, on the Derbyshire-Leicestershire border. However, even as young as 5 she exhibited symptoms of bipolar disorder. She attended a private school for girls, Loughborough High School, where she was a high achieving student. Unfortunately, due to bullying and also to numb her mania and depression, she developed anorexia nervosa and began to self-harm. Katy Sara then went to The University of Nottingham, where she studied Biochemistry and Nutrition. She did her (1st class) thesis on alcohol and metabolism, interested in the psychology of Alcoholism. All this was done despite considerable illness including over 60 suicide attempts and purging-type anorexia - and yet more bullying. Her good work at Nottingham lead to an offer of a place at The University of Oxford, where she studied for a PhD (DPhil) in Clinical Medicine. In her final year she became so ill with bipolar disorder that she was in hospital (first as a day patient, then an inpatient, and eventually a sectioned inpatient). During that year and a half she attempted suicide over 300 times, dying twice, only to be revived. She finally, at the age of 28 got a diagnosis of bipolar disorder and the correct medication, and had been mostly fine ever since. She later wrote up her PhD thesis and published her resu

Abused, Overused and Meaningless True stories of Mental Illness of Abusers & the Traumatized, and the Relationship between those Disorders and Opiate Abuse, Accidental Overdose and Suicide By: Kathleen Kush and Chery Jimenez In Abused, Overused and Meaningless, Kathleen Kush and Chery Jimenez tell true stories taken from their lives and drawn from surveys and interviews with others concerning depression and suicide caused by mental or physical abuse. Some information has been gathered from various print publications, social media posts or other online sources and television media regarding historical and biographical stories. The authors also draw from their personal experiences. Both authors have attempted suicide at least once in their lives. They feel that there are many people who are depressed and afraid to relate their stories because of embarrassment or fear of repercussions. Instead, these people suffer in silence from issues such as depression, PTSD and DID. The authors hope that this book will let those who are suffering know that they are not alone.

Their fear can be overcome with nurturing and therapy.
