Overview: The purpose of this series is to provide students with short vignettes written in board format to review material in the basic sciences. Each book covers a specific topic and covers an array of most commonly seen topics on the boards. This series is not intended to be a complete review, but rather a supplement to course material and other review books. For this reason, it is important to keep the books small (under 125 pages) and inexpensive. Topics covered in the Step one series are: Anatomy, Behavioral Science, Biochemistry, Microbiology: Virology/Immunology/Parasitology (previously named Microbiology I), Microbiology: Bacteriology (previously named Microbiology II), Pathophysiology: Pulmonary System (previously named Pathophysiology I), Pathophysiology: GI System (previously named

lecture starts. Allows the student to capture this time that is otherwise lost for productive use.- MS2, Texas Tech I think that this approach will help me on the USMLE a lot more than studying from a more detailed text. This is much more focused and provides an understanding of clinical cases, unlike most biochemistry lectures. just memorizing a lot of facts. It seems designed for those who want to kill the boards rather than just pass.- MS2, UCLA This book is best used for either studying for the Boards or for class supplementation. In addition, for owners/readers of the First Aid for the USMLE Step 1...the UCV series is an unparalleled complement!! - MS2, Mount Sinai School of Medicine

fast Pathology review for your course or USMLE Step 1, Visual Mnemonics for Pathology is the fun way to study! Laurie Marbas and Erin Case, medical students at Texas Tech University Health Sciences Center, developed this series using "concept diagramming" to shorten their study time and help recall the facts. Each page is formatted with plenty of space for notes and reminders, and some students color in the drawings for better recall. Perfect for medical students -- physician assistants, nurse practitioners and related health professionals will also find Visual Mnemonics valuable.
