TRENDS 2020: Demystifying Bleeding Edge from Leading Edge Tech

The phrase bleeding edge is actually much newer and unrelated to leading edge. It is related to the phrase cutting edge, which refers to a knife blade. The phrase cutting edge means that you are using something new or untested. The phrase bleeding edge is intended to take this meaning one step further, and emphasize the untested and raw aspect.

Why do people say 'bleeding edge' instead of 'leading edge ...

Bleeding Edge to Leading Edge Investment. If you can find a good up and coming technology to invest in, you can end up holding stock in a company that will pay you enormous returns. Think Apple, Microsoft, Nvidia and Google --companies that went from the bleeding edge of technology to the leading edge. Notable investor Ronald Wayne, is an excellent example of a "smart investor" who missed the gains possible in holding a "bleeding edge company."

Peter's MVIS Blog: Bleeding Edge to Leading Edge Investment

Bleeding edge technology is a category of technologies so new that they could have a high risk of being unreliable and lead adopters to incur greater expense in order to make use of them. The term bleeding edge was formed as an allusion to the similar terms "leading edge" and "cutting edge". It tends to imply even greater advancement, albeit at an increased risk because of the unreliability of the software or hardware. The first documented example of this term being used dates to early 1983, when
