the container. Other than the drainage hole, there should also be wiring holes. This will keep the plant fixed in the container. The bonsai pot can be made from plastic, ceramic, and metal.

How to Take Care of Japanese Juniper Bonsai (Our Guide Book)

The prototype for a bonsai tree was taken from regular trees, which grow in subtropical climates, tropical forests, and coniferous places. Naturally, the first problem relates to the climate to which the original is used to. If you are buying a bonsai, then try to buy the ones that are closer to your habitat zone.
