"This book takes you through the collection gallery by gallery, illuminating the art and installations in each room"--From preface.

A single tick bite can have debilitating consequences. Lyme disease is the most common disease carried by ticks in the United States, and the number of those afflicted is growing steadily. If left untreated, the diseases carried by ticks--known as tick-borne diseases--can cause severe pain, fatigue, neurological problems, and other serious health problems. The Institute of Medicine held a workshop October 11-12, 2010, to examine the state of the science in Lyme disease and other tick-borne diseases.

Activated Sludge - 100 Years and Counting covers the current status of all aspects of the activated sludge process and looks forward to its further development in the future. It celebrates 100 years of the Activated Sludge process, from the time that the early developers presented the seminal works that led to its eventual worldwide adoption. The book assembles contributions from renowned world leaders in activated sludge research, development, technology and application. The objective of the book is to summarize the knowledge of all aspects of the activated sludge process and to present and discuss anticipated future developments. The book comprises invited papers that were delivered at the conference "Activated Sludge...100 Years and Counting!", held in Essen, Germany, June 12th to 14th, 2014. Activated Sludge - 100 Years and Counting is of interest to researchers, engineers, designers, operations specialists, and governmental agencies from a wide range of disciplines associated with all aspects of the activated sludge process. Authors: David Jenkins, University of California at Berkeley, USA, Jiri Wanner, Institute of Chemical Technology, Prague, Czech Republic.

The book presented here is the first work of Western literary criticism to examine the Hindi laghukathā - a modern Indian prose genre that has been published since the 1970s in Hindi newspapers and magazines and is characterized by its concise form (500 words on average) and socio-political agenda. The importance of the genre within the Hindi literary scene lies in the fact that the laghukathā is based on indigenous genres which have been modernised, whereas the Hindi short story and the novel are Western genres that have been appropriated and Indianised. A thorough investigation of around 280 primary texts accompanied by an evaluation of the relevant Hindi criticism gives a comprehensive literary analysis of this genre and its historical development. This allows, in conclusion, to delineate an "ideal type" of laghukathā, suggesting a range of compulsory, desirable and optional features. English translations of almost 50 representative Hindi texts complete the picture and thus provide an insight into this genre so far unknown to a Western audience.

Smart brands such as Chipotle, Zazzle, Nike, and Pandora are ditching the outdated 20th century model of a one-size-fits-all approach to providing products and services. From a Netflix movie night to a marriage courtesy of eHarmony, customization is changing every corner of American life and business. The New York Times bestseller Custom Nation is a practical how-to guide by someone who has built his business on the power of customization. YouBar founder Anthony Flynn and business journalist Emily Flynn Vencat explain how marketers, brand managers, and entrepreneurs across all industries can reinvigorate their businesses and increase profits. In Custom Nation, learn: • Why customization is key to today's businesses and what does and doesn't work • How to incorporate customization in new and established businesses to make your products stand out and sell • What strategies work for the most successful and profitable custom brands Drawing on firsthand interviews with the CEOs and founders of dozens of companies specializing in customization, Custom Nation reveals how customization can make any business stand apart and generate market share, increase profit margins, and develop customer loyalty.

Some of the Praise for No Sense of Obligation . . . fascinating analysis of religious belief -- Steve Allen, author, composer, entertainer [A] tour de force of science and religion, reason and faith, denoting in clear and unmistakable language and rhetoric what science really reveals about the cosmos, the world, and ourselves. Michael Shermer, Publisher, Skeptic Magazine; Author, How We Believe: The Search for God in an Age of Science About the Book Rejecting belief without evidence, a scientist searches the scientific, theological, and philosophical literature for a sign from God--and finds him to be an allegory. This remarkable book, written in the layperson's language, leaves no room for unproven ideas and instead seeks hard evidence for the existence of God. The author, a sympathetic critic and observer of religion, finds instead a physical universe that exists reasonlessly. He attributes good and evil to biology, not to God. In place of theism, the author gives us the knowledge that the universe is intelligible and that we are grownups, responsible for ourselves. He finds salvation in the here and now, and no ultimate purpose in life, except as we define it.

The book covers the Aircraft Energy Efficiency (ACEE), consisting of six aeronautical projects born out of the energy crisis of the 1970s and divided between the Lewis and Langley Research Centers in Ohio and Virginia.
