Foreword Care Without Coverage: Too Little, Too Late appears at a critical juncture in our national health policy debate. It comes when, for the first time, legislators and other policy makers are not disputing the need to help individuals and families maintain health insurance coverage during economic downturns, but only the best strategies for doing so.

Uninsured adults living with chronic diseases are less likely to receive appropriate care to manage their health conditions than are those who have health insurance. For the five disease conditions that the Committee examined (diabetes, cardiovascular disease, end-stage renal disease, HIV infection, and mental illness), uninsured patients have consistently worse clinical outcomes than insured patients.
