Summary

CHAPTER 16 EVOLUTION OF

POPULATIONS A. Darwin ' s Ideas

revisited - it was more than 50 years after

Darwin started to develop his theory of

evolution before biologists could determine

how evolution takes place - about 1910,

biologists realized that genes carry the

information that determine traits

Chapter 16 Evolution of Populations

Section 16 – 1 Genes and Variation(pages
393 – 396) This section describes the main
sources of heritable variation in a
population. It also explains how phenotypes
are expressed.

Section 16 – 1 Genes and Variation - Campbell County Schools

A B; What is a gene pool? the combined
genetic information of all the members of a
particular population: What is relative
frequency? the number of times that an allele
occurs in a gene pool compared with the
number of times other alleles occur
