PhET Interactive Simulations (aCC BY-NC-SA 2.0) Tugging a small toy with your dog can be a lot of fun—but it's also a great way to experiment with forces acting on an object. Forces are what scientists call the pushing and pulling on objects. In the photo at left, the boy and the dog are both applying force by pulling in opposite directions.

~~Simulate Net Forces to Predict an Object's Motion ...~~

In this physics simulation, students explore how to create colors using red, green, and blue light. Students will also see how colored filters affect the color that that we see.

~~Color Vision — GameUp — BrainPOP.~~

Phet Color Vision. Debrief on Color Combinations. 10 minutes. Once the time is up, we review the answers on the activity sheets. The big idea is for them to understand that many colors that we see on our computer screens, TVs and smart phone screens come from only three colored pixels: red, green and blue.

~~Lesson Mixing Colors with Light | BetterLesson~~

We use a multidisciplinary approach to explore key questions in evolution, behavior and sensory ecology, with a focus on visual communication and signaling in birds, the most colorful terrestrial vertebrates. Our major research topics include animal coloration and patterning, avian color vision, and the evolution of eggs.

~~The Stoddard Lab~~

PhET Interactive Simulations is a nonprofit project based at the University of Colorado Boulder. Our team of designers, researchers, educators, and developers is dedicated to producing high quality STEM resources. We rely upon our users to keep PhET free for everyone.
