Commercial Applicators License South Dakota Study Guide paperback and entering the world of eBooks. Yes, many may argue on the tradition of reading books made of paper, the real feel of it or the unusual smell of the books that make us nostalgic, but the fact is that with the evolution of eBooks we are also saving some

Pesticide handlers have never had an easy time keeping abreast of the regulations that affect them, but it is getting even more difficult as public pressure adds more layers of new rules. At the same time, there's a trend toward making the individual applicant more responsible for knowing the rules and for getting more training. This is the only volume that, in clear language, describes the system, the current issues in regulation, and the science behind them for the user. It can be helpful for the beginner, the veteran, or anyone who needs a reference encompassing the entire range of pesticide regulatory issues, such as groundwater, endangered species, recordkeeping, worker protection, and more. There's also an exclusive, first-ever compilation of the rules in all 50 states and the District of Columbia for the training and testing required to become a certified applicator-something that varies considerably from state to state.

About 100 papers were presented at this first meeting on deformation of geomaterials held 12-14 Sept. 1994. They address: lab and field tests, and modeling of shear deformation; materials properties and testing; performance; design; prediction. Most participants are Japanese, only one Russian (a formerly vibrant source of geotechnical development). No index. Annotation copyright by Book News, Inc., Portland, OR
