Computers In The Medical Field - SlideShare

Today Computers are an essential part of an hospital.Doctors and administration staff uses computers to manage patient history and medicine stocks etc. Computers play a key role in the medical field.Their uses include storing patient related data, housing knowledge bases, providing the logic and circuitry for medical equipment, scanning and imaging the body, and facilitating speedy communications.

Uses Of Computer in Medical Field – Perfect Computer Notes

Doctors often use tablet computers (which are portable like laptops, but have a touch screen, and no keyboard) as they can be held in one hand, and operated with the other. Notes can be written on the screen using a stylus, and handwriting-recognition software converts it into computer text data. Next Up ? School Management Systems
