(PDF) Culture, Health and Illness, Fifth edition, by Cecil ...

Cultural factors can be either causal contributory or protective in their relation to ill-health. Some of the cultural factors that may be of relevance to epidemiologists are family structure, gender roles, marriage patterns, sexual behavior, contraceptive patterns, population policy, childbirth and child-rearing practices, body image alterations, diet, personal hygiene, housing arrangements, sanitation arrangements, occupations, and economic situation to name a few.
