distance word problems with solutions

Multiply to find how many kilometers Stan walks in 2 days: $2 \text{ km/day} \times 2 \text{ days} = 4 \text{ km}$.

There are 1000 m in 1 km. We are converting from a large unit to a smaller one so we multiply. $4 \times 1000 = 4000$ meters. Stan walks 4000 meters in 2 days.

Problems With

Solutions
and time are three important concepts you can use to solve many

problems if you know the formula. Distance is

the length of space traveled by a moving

object or the length measured between two

points. It is usually denoted by d in math

problems. The rate is the speed at which an object

or person travels.
