This work provides a critical look at business practice in the early 21st century and suggests changes that are both practical and normatively superior. Several chapters present a reflection on business ethics from a societal or macro-organizational point of view. It makes a case for the economic and moral superiority of the sustainability capitalism of the European Union over the finance-based model of the United States. Most major themes in business ethics are covered and some new ones are introduced, including the topic of the right way to teach business ethics. The general approach adopted in this volume is Kantian. Alternative approaches are critically evaluated.
