50 Years of LSD - GBV

In closing, I would remark that 50 years is a very young age for a compound such as LSD which, as a substance, will never die. We cannot foresee its fate for the next 50, 100 or 1000 years, but looking back to its development in the first 50 years we can make, it seems to me, some hopeful speculations for the future.

But now, on the 50th anniversary of LSD's invention, there are new signs of interest and even a push by scientists to rehabilitate the image of "the drug that shook the world." Fresh evidence of LSD's comeback emerged this week when the federal government released results of a survey showing a 30% upswing of acid use by the nation's eighth graders.
