Toxicology is derived from the ancient Greek word " Toxikos " which means toxic or poisonous. It is the branch of medicine that deals with the harmful effects of various chemicals on living beings or other organisms. Forensic medicine is often considered to be a subset of toxicology where knowledge of the methodologies or clinical trials of the substances is used in the investigation of a crime to examine the causes of injury or death.

Toxicology and Forensic Medicine --- Open Journal HTFMQ :

Forensic Pathology. The academic unit of Forensic Medicine and Science at the University of Glasgow encompasses the two disciplines: Forensic Pathology and Forensic Toxicology. Both are primarily service-based. The unit is now the longest established academic forensic institution in the United Kingdom (founded 1839), probably the largest, and one of the few to combine pathology and toxicology under one roof.
