OphthoBook is the printed version of the amazing
OphthoBook.com online book and video series. The
combination of this text, along with the online video lectures,
creates the most informative and easy-to-understand
ophthalmology review ever written. It is geared toward
medical students, optometry students, and non-
ophthalmologists who want to learn more about the eye
without getting bogged down with mindless detail. The book is
broken down into ten chapters: 1. Eye History 2. Anatomy 3.

Ophthalmology

Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

Freeman, is your go-to resource for practical, up-to-date guidance on ocular diseases, surgical procedures, medications, and equipment, as well as paramedical procedures and office management in the ophthalmology, optometry, opticianry or eye care settings. Thoroughly updated content and more than 1,000 full-color illustrations cover all the knowledge and skills you need for your day-to-day duties as well as success on certification and recertification exams. This comprehensive text provides essential learning and practical guidance for ophthalmic assistants, technicians, medical technologists, physician assistants, and all others involved in ocular care, helping each become a valuable asset to the eye care team. Full-color visual guidance for identification of ophthalmic disorders, explanations of difficult concepts, and depictions of the newest equipment used in ophthalmology and optometry. Quick-reference appendices provide hospital/practice forms for more efficient patient record keeping, conversion tables, and numerous language translations, plus information on ocular emergencies, pharmaceuticals, and more. Updated throughout with the latest information on basic science, new testing procedures, new equipment, the role of the assistant in the practice, and an expanded chapter on OCT imaging. A new bonus color image atlas tests your clinical recognition of disease and disorders of the eye. Four brand-new chapters

Ophthalmology

cover the latest industry advances regarding dry eye, vision function and impairment, uveitis, and surgical correction of presbyopia.

This manual is essential preparation for the COA certification exam. Over 750 questions are included covering all of the topics addressed on the exam, such as measuring & recording acuity, lensometry, ocular dressings & shields, tonometry, instruments, & the A-scan, just to name a few. Score yourself on tough questions that could be on the exam. Explanatory answers are given so that the reader is able to completely understand the reason for the correct answer. Study & test taking strategies are also provided, along with suggestions for additional reading.

A compilation of tidbits and factoids to assist in preparation for JCAHPO testing at COA, COT, and COMT levels. I've had at least a dozen people in the last couple months ask for copies of my self-compiled notes I used for studying for (and passing!) the JCAHPO COA, COT, and COMT tests.

Typically when someone asks, I gladly and dutifully run out to Kinko's, copy and print the files, and sometimes have them spiral bound for ease of use as well, and then am reimbursed for the cost. I've finally decided to streamline the process and get out of the middle of it, AND produce a nicer looking product (and save gas money and time in front of the printer, lol!) The factoids are compiled from a multitude of resources through the years and started geared towards the COA. It was then added to and grown as I studied for the COT and COMT exams. I've found that different resources sometimes contradict one another, so occasionally you'll find some contradictions in the notes as well.

"The Certified Ophthalmic Assistant Exam Review Manual,

Third Edition is a revised edition of the best-selling exam preparation manual. It is an essential resource for anyone preparing to become certified as an ophthalmic assistant. With over 1300 exam-style questions and explanatory answers, illustrations, and photographs, this user-friendly text is excellent for both learning and reviewing important eye care topics. Subjects include taking a patient history, lensometry, measuring intraocular pressure, understanding optics, and much more. This edition is also helpful for students and others studying for certification in optometry, contact lenses, and opticianry"--Provided by publisher.

This fourth edition has been revised to include two new chapters important to ophthalmic assistants - refractive surgery concepts and procedures, practice management and coding.

Helps in preparation for the JCAHPO COA Exam. This title contains hundreds of sample questions and answers covering the main topic areas outlined in the exam.

For those who are new to the subject, ocular pharmacology can be a difficult and sometimes overwhelming topic. Ophthalmic Medications and Pharmacology, Second Edition is a reader-friendly guide that provides a quick review and basic clinical reference of ocular pharmacology. In this updated and revised second edition, Drs. Duvall and Kershner present an overview to the medication and drugs found most commonly in ophthalmic practice without overwhelming those professionals new to the subject. Ophthalmic Medications and Pharmacology concisely reviews commonly used and prescribed medications, how they work, dosage, therapeutic use, and potential side effects. This new edition also highlights key information

for patients about the medications they encounter and are prescribed in the clinic. Ophthalmic staff, students, and research professionals looking for an introduction and basic go-to guide will welcome having a copy of Ophthalmic Medications and Pharmacology by their side. New to this edition:

- An appendix focused on the drug approval process.

- A chapter on retinal therapies.
- Study icons to assist in the learning process.

- New coverage of vasoconstrictors.

Delivers the essentials you need for certification as an ophthalmic technician. Updated to include the latest JCAHPO[registered] criteria, this helpful resource contains over 1,300 exam-style questions and explanatory answers covering everything you need to know.

The ultimate ophthalmic dispensing reference, this book provides a step-by-step system for properly fitting and adjusting eyewear. It covers every aspect of dispensing from basic terminology to frame selection to eyewear fitting, adjusting, and repairing. Perfect for both students who are just learning about dispensing and practitioners who want to keep their skills up to date, this resource offers in-depth discussions of all types of lenses, including multifocal, progressive, absorptive, safety, recreational, aspheric, and high index. Plus, it goes beyond the basics to explore the "how" and "why" behind lens selection, to help you better understand and meet your patients' vision needs. A glossary of key terms provides easy access to definitions. Proficiency tests at the end of each chapter reinforce your understanding of the material through multiple-choice, fill-in-the-blank,
