## Beginner ' s Guide to Set Up a Freshwater Aquarium

Adding Water and Heat 1. Look for leaks. Fill the tank with about two inches of water, then wait for a half an hour. If there are any leaks,... 2. Fill the tank the rest of the way. Once you are sure that all the decorations are just the way you want, fill the... 3. Start the filter. Fill the ...

## How to Set Up a Freshwater Aquarium (with Pictures) - wikiHow

Place your freshwater aquarium setup in an area where the light and temperature of the tank won't be affected by external sources such as windows and heater vents. Sunlight that enters the room through an unshaded window could affect the temperature of your tank. This could also lead to green algae problems for your tank down the road.

## How To Set Up A Freshwater Aquarium Fish Tank

Stable water temperature is necessary for the health of your aquarium system. Aquarium heater manufacturers include suggested aquarium size for each heater. But as a general rule, select a heater that provides approximately 3 to 5 watts per aquarium gallon. For example, a 10-gallon aquarium should be outfitted with a 30- to 50-watt heater.

## New Aquarium Setup Guide: Freshwater Aquarium Basics
