This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Following the terrorist attack in New York on September 11, Deepak Chopra addresses the feelings it caused in all of us: fear, the meaning of death and how to find your "higher self" under catastrophic circumstances. The sort of questions he asks are: is there a deep wound at the heart of humanity? Will revenge salve this wound or aggravate it? He also comments "if you and I are having a single thought of violence or hatred against anyone in the world at this moment, we are contributing to the wounding of the world." Although this book has grown out of a tragedy that has affected us all, its spiritual message is also of general application in situations where one might be feeling extremely vulnerable, frighteningly angry, deeply sad and trying to make sense of a terrible situation.

John Brown's Body is an epic American poem written by Stephen Vincent Benet. Its title references the radical abolitionist John Brown, who raided Harpers Ferry in Virginia in the fall of 1859. He was captured and hanged later that year. Benet's poem covers the history of the American Civil War. It won the Pulitzer Prize in 1929.

The attacks on Mumbai on 26 November 2008 brought home to Indians the full horror of terrorism. It also brought home, quite literally, the change in the contemporary face of war. War today is no longer confined to battle fields; it is right here. How is India equipped to deal with this menace which has been described as an 'ultramodern, and a very traditional, conspiracy'? In this collection of essays, nine eminent experts-strategic analysts and military historians-examine, among other issues, the capacity of India's police and paramilitary forces to deal with well-equipped, meticulously planned terror attacks, the army's ability to transform its 'reactive mode' to a more proactive approach and the complex dynamics of the nuclear terror threat. And, the big question, if elements within the Pakistani establishment are involved in the threat to India, what is the most effective way for the Indian state to respond? This collection illuminates one of the most burning issues facing Indians today.

This collection of essays focuses on biotelemetry and discusses its applications for health testing and research.
