In 1992, NFPA 921 – Guidelines for Fire Investigations – was published. The publication’s intent was to define standards of competence related to fire investigations, which it generally has. It is doubtful however that the intent was to stir up controversy, which it also has. Much of the controversy has revolved around the ultimate purpose.

Steps Leading to a Successful Fire Investigation

Fire Investigation Fire investigation involves the examination of all fire-related incidents once firefighters have extinguished the fire. The practice is similar to the examination of crime scenes in that the scene must be preserved and evidence collected and analysed, but with numerous additional difficulties and dangers.

Fire Investigation – The Forensics Library

The Bureau of Fire Investigation will assume that responsibility whenever they respond to the scene. Due diligence should be exercised to determine the building of origin, the floor of origin, the room of origin and ultimately the area of origin. Once the area of origin has been identified an effort should be made to establish the point of origin.
