Reading Popular Culture in Victorian Print: Belgravia and Sensationalism is a comprehensive study of the whole run of the monthly periodical Belgravia under the direction of Mary Elizabeth Braddon. It traces the material history of the magazine, its production and global distribution while at the same time placing its history and content in the context of Victorian popular culture and Victorian discursive formations. Among the questions Reading Popular Culture in Victorian Print investigates are the status of authors in the marketplace, the innovative place Belgravia holds in the history of print culture, the rhetoric of sensationalism in fiction, journalism and pre-cinema, the representation of trade with India, and the use of urban space as a branding strategy. It makes the claim that the periodical is the sensation novel of the 1860s.

In this book the author examines how women detectives are portrayed in film, in literature and on TV. Chapters examine the portrayal of female investigators in each of these four genres: the Gothic novel, the lesbian detective novel, television and film.

This book is written for teachers, researchers, and theorists who have grown up in a world radically different from that of the students they teach and study. It considers the possibilities involved in teaching critical media literacy using popular culture, and explore what such teaching might look like in your classroom. Published by International Reading Association

The Fifth Edition of Barry Brummett's Rhetoric in Popular Culture provides readers with in-depth insight into the techniques of rhetorical criticism to analyze the full spectrum of contemporary issues in popular culture. Exploring a wide range of mass media texts including advertisements, magazines, movies, television, popular music, and social media, Barry Brummett presents key rhetorical concepts and applies them with critical analysis to a variety of exciting examples drawn from today's popular culture. Moving from theory to practice throughout the text, Brummett links concepts in an easy-to-understand way. Rhetoric in Popular Culture covers the concept rhetoric, itself, as well as its place and dynamic change in history, and offers methods to effectively employ rhetorical criticism in daily life. Ideal for courses in rhetorical criticism, the new edition includes new and updated sample critical essays and case studies that demonstrate for readers how the critical methods discussed can be used to study the hidden rhetoric of popular culture.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

"Middle-school students must be able to write explanatory/informational, argument, and narrative genre pieces and respond to literature, both for standardized tests and, more importantly, real-world writing. With a balanced literacy approach, Wolfe provides core instruction, teaching strategies, and mini-lessons on these text types, each of which can be delivered in a four- to six-week time period. Each mini-lesson includes applicable Common Core Standards, materials lists, overviews, planning tips, procedures (including modeling, guided practice, and independent practice opportunities), reading connections, formative assessments, and reproducible graphic organizers for scaffolding. Prerequisite skill overviews and rubrics—both analytic for formative assessments and holistic for summative assessments—are also provided for each genre unit to simplify your teaching and ensure student success."

"This volume explores this state of things by examining criticism of 18 films, juxtaposing them with cognitive-based films to reveal the flaws in the psychoanalytical concepts. By introducing the idea of narrative stimulation to film studies, this work argues for a different method of film critique, encouraging further research into this nascent field"--Provided by publisher.

Each unit includes guided reading, vocabulary building, skillbuilder practice, geography applications, primary sources, literature selections, reteaching activities, enrichment activities for gifted and talented students, history workshop resources and answer key.

For individuals with Down syndrome, the extent of the effect of intellectual disability depends largely on the degree of provision of appropriate support and intervention. In Educating Learners with Down Syndrome, editors Rhonda Faragher and Barbara Clarke have brought together a number of expert contributors, whose chapters review recent findings in the field of DS education, highlight promising practices, and identify areas for future research. While the emphasis is primarily on the school years, links to early intervention and to life post-16 are made, with chapters organized into three parts: conceptual overview of issues in learning and teaching, learning mathematics, and literacy development. The book is also united by the cohesive themes of assessment, evidence-based practice, and inclusive practices. Educating Learners with Down Syndrome importantly incorporates the voices of individuals with Down syndrome, whose personal narratives add significance to the research mission of the text and demonstrate the authors' inclusive philosophy. Aimed at researchers, teacher educators, higher degree students, and policy makers, this book is the first of its kind to provide a compendium of research on educating learners with Down syndrome.
