After the 2004 election, the Republican Party held the White House, both houses of Congress, twenty-eight governorships, and a majority of state legislatures. One-party rule, it seemed, was here to stay. Herding Donkeys tells the improbable tale

of the grassroots resurgence that transformed the Democratic Party from a lonely minority to a sizable majority. It chronicles the inside story of Howard Dean's visionary yet deeply controversial fifty-state strategy, charting his unpredictable journey from insurgent presidential candidate, to front-running flameout, to chairman and conscience of the Democratic Party in an unexpected third act. Ari Berman reveals how the Obama campaign built upon Dean's strategy when others ridiculed it, expanding the ranks of the party and ultimately laying the groundwork for Obama's historic electoral victory—but also sowing the seeds of dissent that would lead to legislative stalemate and intraparty strife. Revelatory and entertaining, in the vein of Timothy Crouse's *The Boys on the Bus* and Rick Perlstein's *Nixonland*, *Herding Donkeys* combines fresh reportage with a rich and colorful cast of characters. It captures the untold stories of the people and places that reshaped the electoral map, painting a vivid portrait of a shifting country while dissecting the possibility and peril of a new era in American politics.

Where do we come from? Who created us? Why are we here? These questions have puzzled us since the dawn of time, but when it became apparent to Jon Stewart and the writers of *The Daily Show* that the world was about to end, they embarked on a massive mission to write a book that summed up the human race: What we looked like; what we accomplished; our achievements in society, government, religion, science and culture -- all in a tome of 238 pages with lots of color photos, graphs and charts. After two weeks of hard work, they had their book. *EARTH (The Book)* is the definitive guide to our species. With their trademark wit, irreverence, and intelligence, Stewart and his team posthumously answer all of life's most hard-hitting questions, completely unburdened by objectivity, journalistic integrity, or even accuracy.

This comprehensive guide will help you through the entire process, from engine repair to bodywork. Don't begin that restoration project without Porter's professional techniques.

Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its

cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.

A sister volume to *First Among Champions: The Alfa Romeo Grand Prix Cars and Bugatti: A Racing History*, this handsome book completes a trilogy devoted to the great motor racing marques of the 1930s and 1950s. It offers a fascinating account of the design, development and competition history of the Maserati cars, and the personalities involved, from the early years when the racing activities depended on private support through to the marque's current revival under Fiat's ownership and Ferrari's guidance.
