Old Ham Dave is David Lyndon, professional electrical engineer and extra class amateur AK4AA, well-qualified to repair, align, and refurbish amateur radio equipment using laboratory quality test equipment. Dave's specialty is the Kenwood "hybrid" transceivers, the TS-520 through TS-830S, plus solid state transceivers TS-930S and TS-940S. He also services some other early solid state Kenwood transceivers and amateur equipment for which documentation is available.

Some users of the TS-930S have reported a slight change in the CW pitch tone when the MONI switch is turned ON and OFF. This may be corrected by changing the following components: On the Signal unit (X57-1000-XX) change R826 from a 1 K ohm resistor to a 10 K ohm resistor and remove C601, a .022uF capacitor from the foil side of the circuit board.

comes close to the rx performance of current, modern day receivers, the TS-930S with the INRAD roofing filter is tough to beat for the price. Added 10/23/2020: I removed the original power supply board and replace dit with e Phoenix Contact switcher and power supply board from <https://k6iok.com/>.

~~Kenwood TS-930S — eHam.net~~

I purchased my Kenwood TS-930s on 05/31/1983 (s/n 3080108). It was reconditioned by KI4NR (LPC Wireless) on June 13, 2005. Thanks to KI4NR all important mods were done (power supply) and now is as good as new. Some time ago, I had an opportunity to compare the receiver side by side with a IC-765. The TS-930 was just as good on receive.

TS-930S power supply, but you don't want to modify your old AVR board, you can buy a ready made kit from Jeff Hilliard of Compudigital that will simplify the process for you. The kit has a replacement AVR board that eliminates the need for the various sub-voltage regulators, resistors, Zener diodes, and even the 5-watt PA current sense resistor.
