This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

This popular text gives students a comprehensive and readable introduction to contemporary issues in learning and behaviour, while providing balanced coverage of classical and instrumental conditioning.

"Prowler" is a marriage of supernatural horror and psychological thriller, a story about how our personal issues can manifest in strange and unnerving ways. • Our protagonist, Victoria, is a successful businesswoman. • She has a history of mental illness, but that's behind her now, despite what her distant husband might say. • What starts out as a normal day at the office is turned upside down by the appearance of a mysterious figure that only Victoria can see. • It soon becomes clear that this being, whatever it is, is following her. • As Victoria tries to make the creature go away, her demons begin to creep up on her again. Surrounded by people who don't believe her and struggling to keep herself together, can Victoria figure out who this being is before her sanity deteriorates? About The Writer Isabella Bailey is a senior at New York University, where she studies film and television. A lifelong storyteller, she began to write when she was in the first grade, and has been honing her craft ever since. She was first published in Excellence, a 2006 poetry compilation, and her writing has since appeared in places such as Baedeker Travel Magazine, 401kWire.com, MFWire.com, and Mindfray.com. Her television screenplays were finalists in both the 2017 and 2019 Fusion Film Festivals, and is writing a novel in her spare time. She hopes to continue to professionally pursue narrative storytelling, and is thrilled to share her work here. Short Story Press publishes short stories written by everyday writers.

A compelling intellectual and literary history of midcentury America In a midcentury American cultural episode forgotten today, intellectuals of all schools shared a belief that human nature was under threat. The immediate result was a glut of dense, abstract books on the "nature of man." But the dawning "age of the crisis of man," as Mark Greif calls it, was far more than a historical curiosity. In this ambitious intellectual and literary history, Greif recovers this lost line of thought to show how it influenced society, politics, and culture before, during, and long after World War II. During the 1930s and 1940s, fears of the barbarization of humanity energized New York intellectuals, Chicago protoconservatives, European Jewish émigrés, and native-born bohemians to seek "re-enlightenment," a new philosophical account of human nature and history. After the war this effort diffused, leading to a rebirth of modern human rights and a new power for the literary arts. Critics' predictions of a "death of the novel" challenged writers to invest bloodless questions of human nature with flesh and detail. Hemingway, Faulkner, and Richard Wright wrote flawed novels of abstract man. Succeeding them, Ralph Ellison, Saul Bellow, Flannery O'Connor, and Thomas Pynchon constituted a new guard who tested philosophical questions against social realities—race, religious faith, and the rise of technology—that kept difference and diversity alive. By the 1960s, the idea of "universal man" gave way to moral antihumanism, as new sensibilities and social movements transformed what had come before. Greif's reframing of a foundational debate takes us beyond old antagonisms into a new future, and gives a prehistory to the fractures of our own era.

Second in a hot and naughty trilogy from the author of Nauti Boy. Angela Knight says, "When I'm in the mood for steamy romance, I read Lora Leigh." So do readers who devoured the author's first novel in the Mackay Cousins trilogy, Nauti Boy. Now, in Nauti Nights, Leigh delivers an even hotter tale of a Kentucky marine who'll anything to get the woman he wants. Luckily for him, she wants it bad. James "Dawg" Mackay has lusted after sweet Crista for years. Just as many as she's spent running from him-and from a dangerous attraction. But for Crista, running isn't an option anymore because Dawg's got a plan to get her and keep her. It's kind of low-down-but completely hot.
