Overview. It's impossible to tune an Oracle database without understanding SQL tuning. Oracle is a SQL processing engine and the execution speed of any SQL query is influenced by many factors, both internal and external. As a declarative data access method, SQL relies on the Oracle cost-based optimizer to always choose the "best" execution plan for every SQL query.

Oracle Server Tuning. Oracle became one of the world's leading databases because it is optimized to work on any database server from a mainframe to a Macintosh. However, Oracle does not run in a vacuum and the DBA must be careful to avoid server overload conditions. Fortunately, the Oracle10g Automated Workload Repository (AWR) tracks server performance over time and allows us to create detailed management reports that show exactly when the server was overloaded.
