Germany's armoured forces the Panzerwaffe were still in their infancy. The restrictions imposed by the Treaty of Versailles meant that German tank production lagged behind its enemies. Initial armour campaigns in Poland were not overly successful and changes were needed before the invasion of France. This book examines the organizational changes, developments in doctrine and tactics and improved command and control that provided the basis for the spectacular success of the Panzer divisions in 1940. Achieving tactical and operational surprise, the Panzer divisions broke through enemy defences, enveloping a large number of hostile forces at Dunkirk. The legend of the Blitzkrieg was born.

“Certainly my first recourse from now on when looking at the

SS panzer divisions. Give yourself a treat and buy a copy ASAP if tanks are your thing” (Army Rumour Service). The Das Reich Division was the most infamous unit of the Waffen-SS. Originally a paramilitary formation raised to protect the members of the Nazi Party, it was founded in 1934 as the SS-Verfügungstruppe. During the invasion of Poland, the unit fought as a mobile infantry regiment. After the Battle of France, the SS-VT was officially renamed the Waffen-SS, and in 1941, the Verfügungs-Division was renamed Reich, later Das Reich. By the time Das Reich took part in the battle of Moscow, it had lost sixty percent of its combat strength. It was pulled off the front in mid-1942 and sent to refit as a panzer-grenadier division. Returning to the Eastern Front, Das Reich took part in the fighting around Kharkov and Kursk. Late in

the year, it was designated a panzer division. In 1944, the unit was stationed in southern France when the Allies landed in Normandy. The following days saw the division commit atrocities, hanging one hundred local men in the town of Tulle in reprisal for German losses, and massacring 642 French civilians in Oradour-sur-Glane, allegedly in retaliation for partisan activity in the area. Later in the Normandy fighting, Das Reich was encircled in the Roncey pocket by US 2nd Armored Division, losing most of their armored equipment. Das Reich surrendered in May 1945. “Another fascinating piece of military history from the opposite point of view . . . this doesn’t purport to be an illustrated history of the Reich, but it damn well is!” —Books Monthly

Hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and Jagdtiger. Color illustrations focus on unit markings, numbering, and camouflage. Accompanying text chronicles the unit's combat operations plus there are personal accounts from the men who rode in these mechanical monsters.

In World War II the Panzer crews spearheaded every major campaign or battle from the invasions of Poland and France to the last great counter-offensive in the Ardennes. Germany's Panzer crews fought on every front and along the way earned a formidable reputation for élan in attack and steadfastness in defence. This book charts the recruitment,

training, service conditions and combat experience of a typical World War II German tank crewman, serving on various fronts from the scorching heat of the Western Desert to the frozen tundra of the Eastern Front. It features many unpublished photographs from both private collectors and Panzer veterans themselves.

Despite being disdained by the German Army's professional officer corps, the military branch of the Nazi SS security organisation grew from an initial strength of only a handful of battalions at the outbreak of war in 1939 to hundreds of thousands of troops in dozens of divisions. The battlefield reputation of the premier armoured and mechanised divisions would become second to none; lavishly equipped and regarded as utterly reliable, they were thrown into many desperate battles on both Western and Eastern fronts, often

achieving remarkable results. Illustrated with rare photographs, this first of four Men-at-Arms titles details the organisation, uniforms and insignia of the Waffen-SS.
