After reading this thread, I ordered a copy of Doherty and Moore's "The Photographic Atlas of the Stars" to compare with my "The Cambridge Photographic Star Atlas."

Used copies are available pretty cheap, and I managed to pick one up for \$3.33, with \$3.99 shipping. It is a PRETTY book, and a nice daytime browser.

Another
complaint about
The Cambridge
Photographic
Star Atlas
--stars do not
have a 6-point
flare. In my
opinion, the
photographer
would have done
much better to
have removed the

star filter from
the imaging
device before
capturing the
images. I'm
guessing Barnard
used a bigger
scope and it
really had
nothing to do
with digital vs.
glass plates.
