Encyclopedia of Ecology, Second Edition continues the acclaimed work of the previous edition published in 2008. It covers all scales of biological organization, from organisms, to populations, to communities and ecosystems. Laboratory, field, simulation modelling, and theoretical approaches are presented to show how living systems sustain structure and function in space and time. New areas of focus include micro- and macro scales, molecular and genetic ecology, and global ecology (e.g., climate change, earth transformations, ecosystem services, and the food-water-energy nexus) are included. In addition, new, international experts in ecology contribute on a variety of topics. Offers the most broad-ranging and comprehensive resource available in the field of ecology Provides foundational content and suggests further reading Incorporates the expertise of over 500 outstanding investigators in the field of ecology, including top young scientists with both research and teaching experience Includes multimedia resources, such as an Interactive Map Viewer and links to a CSDMS

Globalization is often discussed in terms of its ecological ramifications. Yet, while ecological imbalance is today one of the greatest threats to mankind, globalization is also a reality that is here to stay. The volume, therefore, seeks to address how globalizing and environmental interests can be reconciled. The essays in this volume state that globalization can work both in favour of and against the environment. The major issues discussed in this topical volume are, how globalization can be used to promote environmental reforms; the role of individuals, private organizations and governments in keeping environmental degradation in check and in promoting environmental reform; globalization and ecological inequality; women, the environment and globalization; changing nature of environmental movements; overpopulation and the ecology; the relation between the ecology and the economy; and the effects of global climate changes.

The perfect match science series is written based on the latest primary science syllabus issued by the Ministry of Education, Singapore. It is designed to leverage on pupils' natural curiosity and nurture the inquirer in them, which is central to the latest science curriculum framework.
