days. Rest is less; you can calculate on your own. That is how you can calculate a critical path.

The Critical Path Method with Example | PMP Notes

The critical path is the path in which all activities have zero slack. The

Online Library Pmp Critical Path Exercise

computation is performed starting from an AON representation of the plan. The first step is “preprocessing” the plan by:

- Transforming all dependencies into FS dependencies. In the case of the exercise, we have a SS dependency between Task 1 and Task 9.
