Thermal infrared imaging has been proposed,
and is now used, as a tool for the non-
contact and non-invasive computational
assessment of human autonomic nervous
activity and psychophysiological states.

~~New Frontiers for Applications of Thermal
Infrared Imaging ...~~

Significance. Conventional wisdom states that

Acces PDF Practical Applications Of Infrared Thermal Sensing And Imaging

the hotter an object is, the brighter it glows. This is the case for thermal light at any wavelength and enables applications such as infrared imaging and noncontact thermometry. We demonstrate a coating that emits the same amount of thermal radiation irrespective of temperature, within a temperature range of about 30 °C.
