## Equine practice

An equine vet can work many environments, but they generally work closely with both equine patients and their human owners. The typical routine for an equine vet includes performing basic exams, giving routine vaccinations, drawing blood, prescribing medications, evaluating and suturing wounds, performing surgeries, and giving post-surgical exams.

that is more prevalent in older people. Surgical intervention is a safe treatment of choice. However, the recurrence rate is relatively high and the outcome is not always satisfactory among surgically treated patients. It is believed that aberrant angiogenesis and intracapsular inflammation contribute to the development of CSDH.

WJMH: The World Journal of Men's Health

Background. Chronic subdural hematoma (CSDH) is a common type of encephalic hematoma with an incidence of 5/10,000 in the general population and 58/10,000 in people who are 70 years or older [1]. Head trauma is the most common risk factor for CSDH [2], along with age. CSDH occurs in up to 26.5 % of patients who are 65 years or older.
